

IV-SAM-VXS-1B

1 Beyond Automate™ VX Voice-Activated, Multi-Camera Switching Solution

- *Automatic camera switching based on the active speaking participant*
- *Switches between multiple cameras for broadcast-style production*
- *Supports 3 SDI and 5 NDI sources; outputs SDI and NDI streams*
- *Intelligent video algorithm follows the conversation, avoiding excessive camera switching*
- *Easy configuration with the browser-based Room Design tool*

The IV-SAM-VXS-1B Automate™ VX is a voice-activated camera switching solution that brings the full multi-camera studio experience to meetings, town halls, and classrooms. Camera switching and movement is done automatically based on the location of the active speaking participant. Automate VX comes with built-in recording and streaming capability along with the outputs for video conferencing.

Professional Services

The 1 Beyond Automate system requires the purchase of 1 Beyond Camera Systems Remote Professional Services.

An Equipment Proposal issued by the [Crestron Sales Support Services](#) team is required before placing an order for IV-SAM-VXS-1B. All orders must reference the Equipment Proposal number and include the complete camera system outlined in the Equipment Proposal, including Professional Services.

NOTE: The Equipment Proposal will include the required 1 Beyond cameras, Automate VX system, and 1 Beyond Camera Systems Remote Professional Services. It will also identify third-party equipment, such as microphones, which are necessary to complete the system and must be purchased separately from the applicable manufacturer, based upon the information provided regarding room size, furniture layout, and design specifics.

Visit [IV-PROSERVICE-1B](#) for more details.

Improved Video for Meetings

See who is speaking with close-up camera shots. Clean production-style camera switching provides a more engaging experience for remote participants or viewers.

Voice-Activated Switching

Hands-free operation uses data from the room microphones to locate the active talker. Specificity is determined by the mic type used.

Adapts to Room Sizes and Uses

Cameras can be located throughout the room for best camera angles. Accommodates different furniture layouts with a single button push.

Graphics, Titles, and Layouts

Combine multiple sources, superimpose titles and add custom graphics. A graphical user interface allows for custom layouts, not just picture in picture or side by side.

Browser or Third-Party Control

Enable auto-switching, record/stream, and change room configurations or layouts from most phones, tablets or browsers. API for Crestron® and other 3rd party control.

Conference, Stream, and/or Record

In addition to high quality output for hard or soft codecs, the system has a built-in encoder and recorder to enable multiple live streams and over 100 hours of recording.

Room Designer Web Interface

The Room Designer tool provides the ability to design and configure meeting spaces. The browser interface is used to help choose the best position for a variety of cameras and microphones within a room.

Specifications

Automate VX Capabilities

Titles, Graphics, Layouts	Titles, logos, backgrounds can be added, Easy-to-use graphic designer to create any multi-source layout
Program Record	MP4 file (H.264 codec). User-selectable bitrate up to 10 Mbps
